

Donkeys at Top Farm

Top Farm is home to two Donkeys, Sam and Napoleon. Top Farm and its Donkeys are inspected by the Donkey Sanctuary every 6 months and in March 2019 Top Farm was presented with a Donkey Guardianship Award for the high level of care and dedication that we show to our Donkeys.

Typical Daily Activities

Each day the service users will be required to muck out and tidy the donkey enclosure as well as provide them with food and fresh water.

In The Wild

Donkeys come from Desert Areas where food and water is sparse, for this reason Donkeys are designed to utilize 95% of their food intake whilst also extracting any moisture from it as part of their water intake.

Did You Know?

Donkeys have exceptionally good memories!
